

Tennessee Crop Weather

Tennessee Field Office • PO Box 41505 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday 3:00 PM; April 5, 2021

For the Week Ending April 4, 2021

WEATHER EXTREMES IMPACT PROGRESS

Heavy rains resulting in widespread flooding caused limited field work. Damage from the flooding is still being assessed. Those that were able to work in the fields applied anhydrous ammonia and burn-down applications in preparation for planting. Fall planted wheat is reported in mostly good condition despite potential impacts from flooding and two freeze events. Producers are expecting green-up of pastures. Corn planting is expected to start in full force in the coming weeks as weather allows. There were 3.4 days suitable for field work. Topsoil moisture was rated 1 percent short, 68 percent adequate, and 31 percent surplus. Subsoil moisture was rated 1 percent short, 65 percent adequate, and 34 percent surplus.
